

REPO | SYSTEMS

Repossession - Made Easy

REPO-SYSTEMS is a management and communications tool for the collateral recovery industry - presently focused on automobile repossession. **Lending Institutions / Banks** and **Automobile Recovery Agents** can communicate in real-time to enhance productivity, efficiency and accuracy in the recovery of the automobile. Repo-Systems provides a streamlined end-to-end collateral recovery solution that automates the repossession process from assignment and recovery, to disposition.

REPO-SYSTEMS can streamline the repossession process, virtually eliminating the need for phone, fax or email to establish up to the minute account or automobile recovery status. Lending Institutions / Banks and Automobile Recovery Agents can access a centralized secure system to review and provide up-to-date information in real time.

ADVANTAGES:

REPO-SYSTEMS can be both **powerful** and **profitable**. The cost savings for both Lending Institutions and Automobile Recovery Agents in man-hours, phone, fax, mail, stationary, filing etc. expense can be substantial. Add to that the efficiency gains that streamline the repossession process makes Repo-Systems a **must have** for both Lending Institutions and Automobile Recovery Agents.

KEY FEATURES

- Streamlined standardized processes
- Paperless automation
- Automated repossession assignment
- Automated automobile redemption
- Real time repossession status
- Automated asset hold aging
- Electronic document storage
- Flexible asset condition reporting
- Extensive access control
- Automated invoicing
- Powerful reporting engine
- Flexible implementation
- Automated VIN lookup
- Location mapping with GPS coordinates
- Secure Systems

BENEFITS

- Overhead substantially reduced
- Redundant data entry eliminated
- File processing costs reduced
- Telephone time greatly reduced
- Processing capacity increased
- Assignments quickly processed and dispatched
- Efficiency gains direct to bottom line

Repossession - Made Easy

SERVICES

Internet System - We offer an internet solution, which you will have access to. Your data is completely secure and allows the ability for Lending institutions to enter data into the system and route directly to a repossession company or group of companies for processing.

Web / Development Services – We offer development services which can include integration of RepoSystems into your current website, or standard development services by the project or by the hour.

SECURITY

REPO-SYSTEMS security incorporates an OPTIONAL "two factor" authentication to authenticate genuine users, and 128 bit SSL secure connectivity to ensure data encryption. Both security and data encryption exceed industry accepted standards for information security by Lending Institutions.

REPO-SYSTEMS also incorporates an OPTIONAL security feature which will check the incoming IP address (IP Security) of the user accessing the system. If the IP address is not valid the system will NOT allow the user to logon, keeping the data secure.
